DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, 23-33, 45 and 47, drawn to a coupler for connecting a pair of like corrugated chambers, a conduit, a method of fabricating a coupler for connecting a pair of like corrugated chambers, and a method of constructing a conduit, classified in class 405, subclass 100.
- II. Claims 12-22, 34-44, 46 and 48, drawn to a coupler for connecting a pair of like corrugated chambers, a conduit, a method of fabricating a coupler for connecting a pair of like corrugated chambers, and a method of constructing a conduit, classified in class 405, subclass 99.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as in situations requiring a boss. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3671

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
